Docket No. E-0157A-09-0429

**Request for a REHEARING and to
Reconsider ACC Order. No. 71456**

100% of the repayment of the **SSVEC Clean Renewable Energy Bond** is being taken from the REST PROGRAM. As stated by Jack Blair, Chief Member Services SSVEC, the present 2010 Program will have a backlog of rebates for approximately 3 years. This does not include any new requests, which would push rebates even farther into the future. This is a hardship to the customers and installers that submitted rebate applications in good faith with a reasonable expectation of prompt payment of the rebate. This is also a hardship for all customers that will be paying for the Large Scale Renewable Energy installations at full price or an inflated prices, through SSVEC constructed projects.

1 It is quite clear that SSVEC could stretch Cooperator dollars through leveraging the
2 investment of residential and small business customers willing to install Renewable Energy
3 Systems and participate in the REST Rebate Program.
4

5 **The 2010 REST Program as passed will allow 100% of the SSVEC Clean**
6 **Renewable Energy Bond payments for 2010 to be paid back from the REST Program.**
7 **The question to be asked is "should 100% of this payment come from the REST**
8 **Tariff?".**
9

10 **This goes against the principle of the REST Program for Residential**
11 **Installations to be 50% of the program. SSVEC is in arrears, since around 80% of 2009**
12 **REST funds went to pay CREB Bond Debt. I believe it is imperative that the CREB**
13 **payment allocation from the 2010 SSVEC REST funds be reviewed to more fairly**
14 **reflect the intent of the REST Program.**
15

16 For these reasons, I respectfully request a rehearing be held to hear the facts
17 and to develop a fair and reasonable SSVEC REST plan for 2010 to meet the needs of the
18 SSVEC member/owners, renewable energy contractors and the company. Specifically, a
19 review should occur of the allocation of the CREB Bond payments and the Rebate Schedule.
